Space hosts

Permissions:

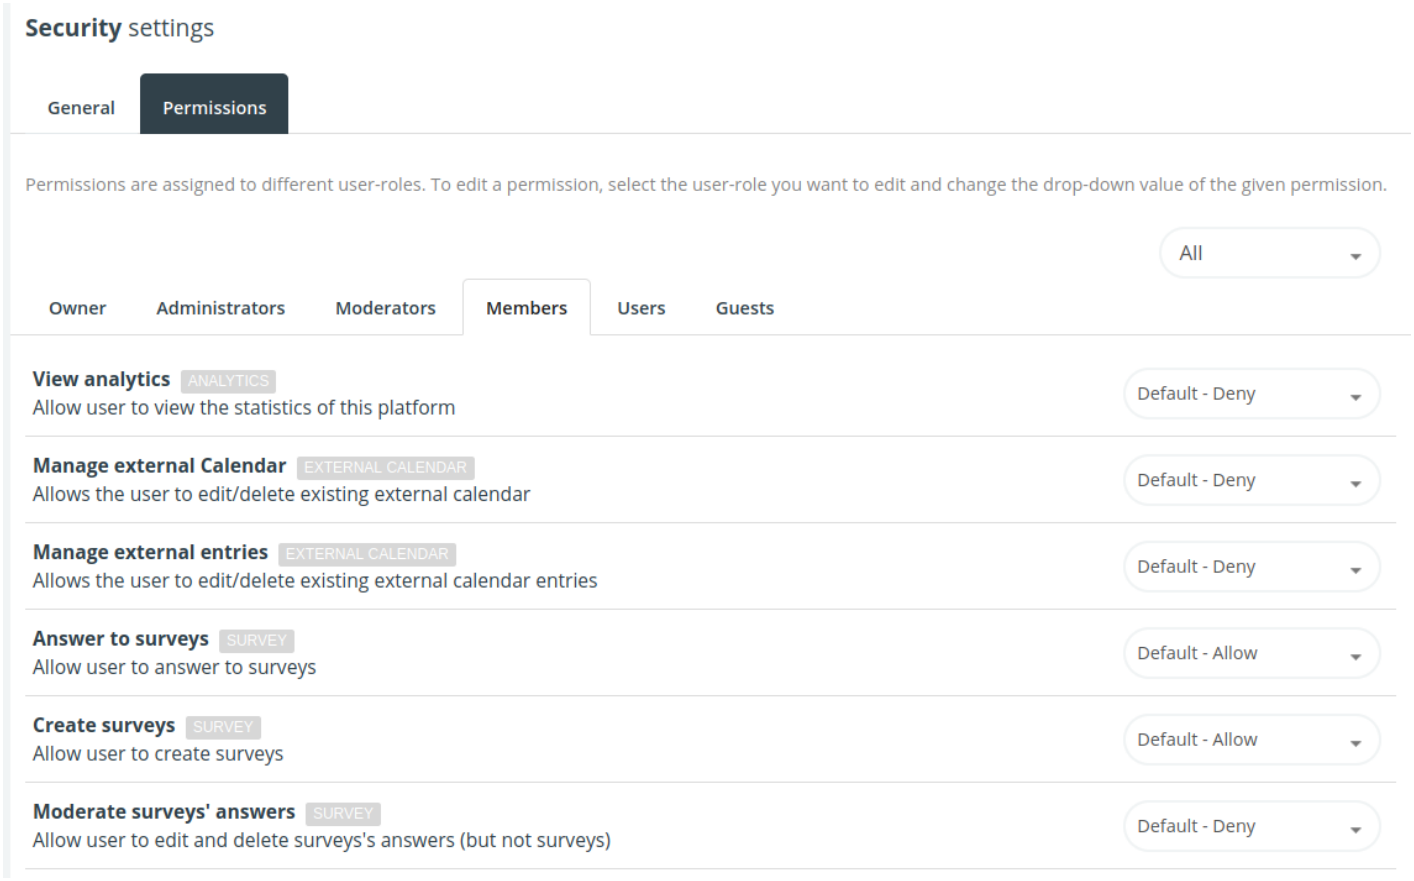

Space hosts can configure many of the permissions for their spaces.

They can access these by accessing https://hub.transition-space.org/s/**YOUR-SPACE-NAME/space/manage/security/permissions

You access this by clicking on the grey settings wheel in your space and clicking on 'security'

You will then see the settings that can be changed

You can change any of these settings to your preference. If you would like advice about the implications of these settings then please ask in the space-hosts Mattermost channel

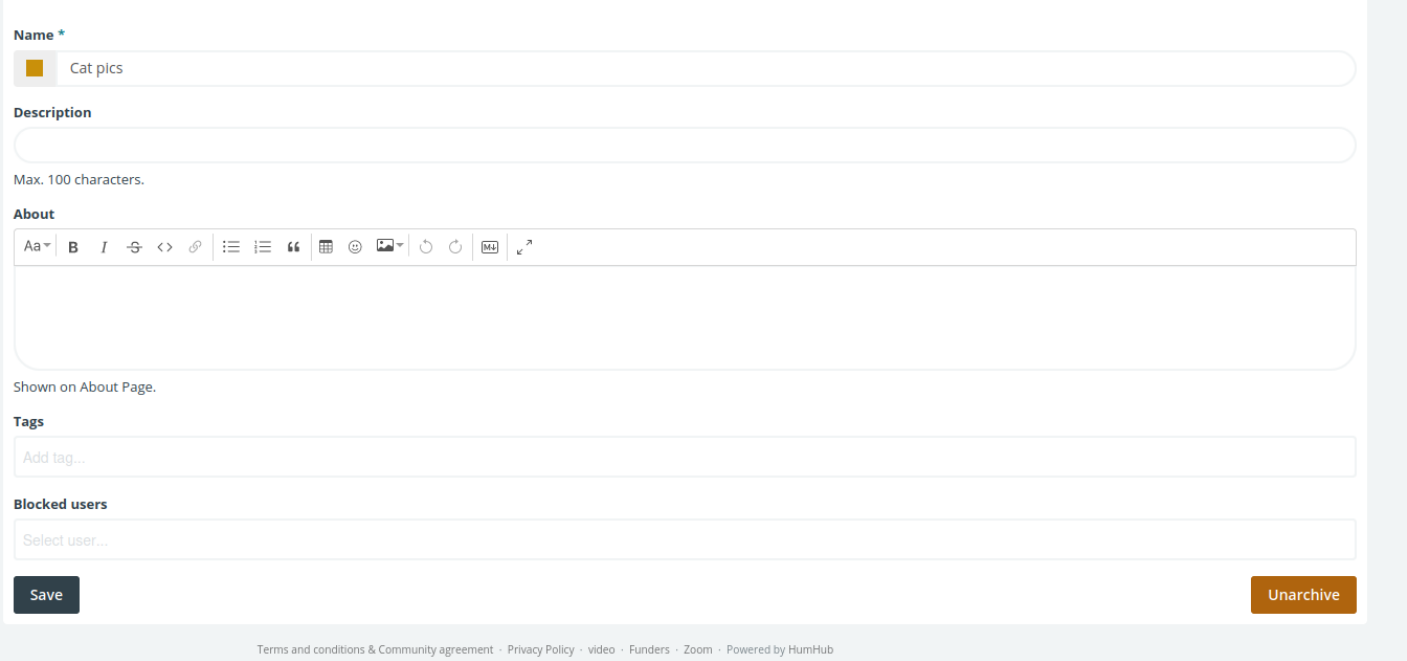

Notifications

By default, users will have any posts in spaces they are members of added to their daily digest email.

If you want to do a specific notification (a separate email from the daily digest) then you could 'notify all' in the post. This will create a separate email just for that post. It will also create a push notification/popup to users that have enabled that in their browser or mobile device.

Archive

Space hosts are able to 'Archive' spaces

When spaces are archived:

- All content is hidden to non-admins. It is no longer searchable (even by members of that space)
- Admins can 'un-archive' it at a later date and make it visible/ searchable by members.
- The content remains accessible to admins even when in an archived state.
