

Polls

Stop discussing, let the votes speak for themselves. The Polls module allows you to resolve disputes quickly. Let the majority decide, or just get an opinion on your urgent questions.

In spaces where polls are enabled you will see the option in the top right tab of the post window.

The screenshot shows a user interface for creating a poll. At the top right, there are tabs for 'Post', 'Q&A', and 'Poll', with 'Poll' selected. Below the tabs is a text input field containing the question: 'Should we complete the documentation?'. Underneath the question is a rich text editor with various formatting options (bold, italic, link, list, quote, table, emoji, image, video, link, unlink) and a text area containing the question: 'How important is completing the documentation?'. Below the text area is a section titled 'Answers' with three input fields: 'Yes pretty soon', 'Sometime', and 'No one reads it anyway'. Each answer field has a trash icon on the right. Below the answer fields are four checkboxes: 'Multiple answers per user', 'Anonymous Votes?', 'Display answers in random order?', and 'Hide results until poll is closed?'. At the bottom left is a 'Submit' button, and at the bottom right is a gear icon for settings.

Overviews

- Offer single or multiple choice
- Hide the results until the poll is closed
- Vote anonymously
- Discuss the results in the comments

Revision #1
